

HERWE DERMASEPT N GEL

Hand disinfectant gel against bacteria and viruses

| | | | | | | | | | |
|---|--|--|---------|---|---------|---------------------------------------|---------|-------------------------|---------|
| Description: | HERWE DERMASEPT N GEL is an unscented, dye-free, alcohol-containing and slightly viscous preparation for hygienic hand disinfection, effective against bacteria, yeast and viruses (limited virucidal). | | | | | | | | |
| Composition: | HERWE DERMASEPT N GEL is an aqueous-alcoholic solution with thickeners and skin-caring additives. Active ingredient: 63.0 g / 100 g ethanol. | | | | | | | | |
| Properties: | HERWE DERMASEPT N GEL was developed for hygienic hand disinfection without use of water. HERWE DERMASEPT N GEL has been tested in accordance with EN 1500 (hygienic hand disinfection) and DW / RKI guidelines (test for limited virucidal properties) and shows broad efficacy spectrum against bacteria, yeasts, enveloped viruses (e.g. H1N1 (swine flu virus), H5N1 (bird flu virus), HBV, HCV and HIV) as well as against noro- and adenoviruses. HERWE DERMASEPT N GEL is quickly absorbed and, thanks to the addition of nourishing allantoin, glycerine and a fatty alcohol, is well tolerated by the skin. <i>Listed according to VAH (DGHM) and IHO (virucidal list). Dermatologically tested.</i> | | | | | | | | |
| Area of use: | HERWE DERMASEPT N GEL is used wherever there is an increased risk of the transmission of bacteria and viruses, e.g. in industry (food processing, medical device manufacture), in health care and in care facilities. | | | | | | | | |
| Application: | Take a sufficient amount of HERWE DERMASEPT N GEL into dry hands. Keep hands moist with the undiluted product during the entire contact time and if necessary apply hand disinfectant in portions again. <u>Contact times:</u> <table border="0" style="width: 100%;"> <tr> <td>Hygienic hand disinfection: (EN 1500):</td> <td style="text-align: right;">30 sec.</td> </tr> <tr> <td>Limited virucidal according to RKI/DW recommendation:</td> <td style="text-align: right;">15 sec.</td> </tr> <tr> <td>Noroviruses (MNV according EN 14476):</td> <td style="text-align: right;">30 sec.</td> </tr> <tr> <td>Rotaviruses (EN 14476):</td> <td style="text-align: right;">15 Sek.</td> </tr> </table> | Hygienic hand disinfection: (EN 1500): | 30 sec. | Limited virucidal according to RKI/DW recommendation: | 15 sec. | Noroviruses (MNV according EN 14476): | 30 sec. | Rotaviruses (EN 14476): | 15 Sek. |
| Hygienic hand disinfection: (EN 1500): | 30 sec. | | | | | | | | |
