What does the DfE 'Design for the Environment' mark mean? It assures that the EPA's Design for the Environment (DfE) scientific review team has screened each ingredient for potential human health and environmental effects, and contains ingredients that pose the least concern among chemicals in their class. The DfE mark is an easy way to know you are choosing a product that is as safe as possible for people and the environment.

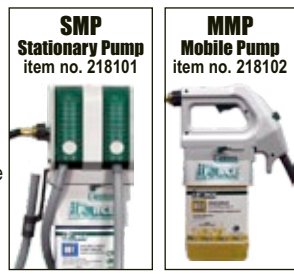

What does the Earth Force® 'cleaning with the earth in mind' mark mean? Earth Force® products are formulated with the environment and human health strongly in mind and use the following types of ingredients: biodegradable surfactants, with byproducts that are less toxic than the parent compound; solvents that are not hazardous air pollutants and pose no threat to the Earth's ozone layer; fragrances that have been screened for potential hazardous and persistent ingredients; and other components with a more positive environmental profile than in conventional cleaning and floor care products.

What does The CDDS Force™ 'cleaning with the force' mark mean? This mark represents our proprietary super concentrates designed specifically for The CDDS Force™ chemical dilution and dispensing system. This system reduces waste, shipping costs, and contributes to package source reduction efforts. The CDDS Force™ eliminates the potential for employees to be exposed to concentrated chemicals and/or accidentally mix harmful chemicals.

The CDDS Force™ concentrates are manufactured exclusively by: ABC Compounding Co., Inc. Atlanta, GA/Dallas TX rev.0902

At ABC Compounding, we recognize the importance of caring for the world's environment as well as ensuring a safer workplace. We take this responsibility seriously and have developed a safer, user friendly product line and commit to keeping it at the leading edge of green technology. Our Earth Force products are manufactured with environmentally preferable chemistry to help ensure a healthier and safer environment.

Maintenance Procedures

Achieve excellence in your floor finish program by following proper maintenance procedures for the finish you select. If the following steps are adhered to, you may anticipate excellent durability and gloss for up to one year before stripping is required.

STRIPPING

- Dilute the AERO® floor finish remover of your choice as required. Generally one part finish remover to four parts water will achieve good results. Never use a stripper undiluted and if available, use hot water.
- Apply diluted floor finish remover liberally to the floor with a clean mop. Allow finish remover to remain on floor for about 10 minutes but do not allow the solution to dry on the floor.
- Scrub thoroughly with a stripping pad and pick up the stripped finish with a wet vac.
- Rinse twice with clear water using a new clean mop head.
- Let the floor dry and check for a powdery residue. Check for any remaining finish in the corners and along baseboards and re-strip where necessary using AERO® GEL-STRIP or AERO® BASEBOARD STRIPPER.
- Properly stripped floors appear dull all over. Allow to fully dry before applying sealer or finish.

APPLYING FLOOR FINISH

- (optional) Apply 1 or 2 thin coats of AERO® ULTRA BOND sealer with a new clean mop allowing at least 30 minutes drying time between coats.
- Apply 3 or 4 thin coats of a finish you have selected allowing at least 30 minutes drying time between coats. Use a clean, dry mop head. Do not use the same mop head that has been used for stripping or cleaning.
- Drying times vary, make sure each coat is completely dry and tack-free before applying the next coat of finish.
- If desired, dry burnish after the last coat is dry and tack-free.

CLEANING

- Dilute a neutral cleaner with water according to directions.
- Apply with a new clean mop or an automatic scrubber. Do not let the solution remain on the floor for more than 5-10 minutes.
- Rinse with clean water, pick up with wet-vac and allow to fully dry.

RE-COATING

- Make sure the floor is completely clean, dry and free of residue (see section on cleaning).
- Re-coat with 1 or 2 thin coats of a finish approximately once a month or as desired to maintain a good gloss. Allow adequate drying time between coats.

SPRAY BUFFING (*spray buffs are used with low speed buffers only*)

- Apply spray buff (light mist) on clean floor with trigger sprayer, buff immediately while floor is wet.
- Spray buff 2-3 times a week or as desired to maintain good gloss.

HIGH SPEED BURNISHING

(*restorers are used with high speed and ultra high speed burnishers*)

- Dilute one part restorer to three parts water and apply one coat on clean floor using a clean mop.
- Allow to dry and burnish with a high speed burnisher.

Bio Live 6935

Destroys Odors Naturally

Color: Green
Fragrance: Fresh

Dilution: 4-8oz/Gal
pH: 8.0

This product is a liquid concentrated microbial cleaner for use on hard surface floors such as quarry tile and concrete in commercial kitchens and other food preparation areas. It combines biodegradable surfactants for immediate cleaning and a blend of specifically selected microbial cultures that penetrate deep into tile pores for the breakdown of residual organic material. The cleaner is recommended to be emptied down the drain line where it will offer an effective drain and grease trap treatment. Regular use prevents grease build-up, reduces slippery floor surfaces, maintains a sanitary and odor-free floor, reduces organic material buildup in drains, and eliminates conventional hazardous cleaners.

Rite-Hite 6249
Concentrated Growth Retardant

Color: Colorless
Fragrance: Odorless

Dilution: Varies
pH: 8.0

Labor saving concentrated liquid growth retardant that inhibits growth of grass, trees, shrubs, and ivy. Also controls wild onions, garlic, and biennial type weeds. Rite-Hite is absorbed directly into the green grass blades and translocated by the plant fluid to the active growth areas of the plant where all cell division is retarded, thereby aiding in preventing seed head formation and slowing leaf growth. Rite-Hite reduces the need for mowing of hazardous areas where a seasonal growth of 6 to 12 inches can be tolerated. This product can be used along highways, airports, military installations, roughs of golf courses, and similar areas. Water dilutable.

Rust Free 456720PA*Non-flammable, Penetrating Oil***Fragrance:** Solvent

Reduces hazards by eliminating the extremely flammable characteristics of most penetrating sprays. Frees rusted and corroded nuts, bolts, studs, and set screws. Penetrates through grease, soil, and sludge. Lubricates and prevents corrosion on rusted and frozen parts. 360° valve, USDA H2, NSF registered.

Canned Air 463416FA*Air Duster with Powerful Blast.***Fragrance:** Slight Ether

Non-flammable. Powerful blast. Pressurized, highly volatile product for dry cleaning of electrical and electronic equipment. Net 10 oz.

Bulldog 463720PA*Yellow Penetrating Gel with Teflon®***Fragrance:** Solvent

Prevents rust and corrosion and resists water washout. Excellent for use on door hinges, open gears, wire ropes, cables, conveyors, and spokes. Net 13oz.

Silicone Spray 451720SA*General Purpose Silicone Lubricant***Fragrance:** Odorless

Reacted grade silicone, fast evaporating solvents, fine mist spray pattern that allows for even and controlled distribution. Does not cause fish eyes in paint, and is therefore useful in auto body shops and mold-release applications. 360° valve, USDA H2, NSF registered. Net 13oz.

Food Equipment Lube 461720SA*Silicone-based Spray***Fragrance:** Odorless

Non-staining, low odor, lubricant formulated for use on machine parts and equipment in locations in which there is potential exposure of the lubricated part to food. For food plant and other industrial use. USDA H1. NSF registered.

Moli-Lube 467620SA*Dry Lubricant with Moly & Graphite***Fragrance:** Solvent

Keeps machined metal from oxidizing and lubricates in extreme environments. Moli-Lube will not wash off. Once it dries, it will stay in place providing lubricity even under very heavy loads (in excess of 20,000 psi). Excellent for oil field pipe threads. Effective up to 1000°F.

Open Gear Lube 467216SA*Resistant to Water***Fragrance:** Solvent

Extremely tacky wear resistant lubricant. Resistant to water. Perfect for construction equipment, gears, sprockets, slow moving chains, and machinery. Prevents corrosion and resists oxidation by repelling moisture. Perfect for fifth wheels due to its wear resistance and adhesion. Reduces down-time and noise due to metal to metal contact. Provides a smooth and uniform coating for excellent lubricity and corrosion protection on machinery and various metal parts and equipment. Net 12oz.

White Lithium Grease 453120SA*Chain & Cable Lube***Fragrance:** Solvent

Multi-purpose grease with a combination of solvents to impart excellent penetrating properties. Water and pressure resistant and effective at temperatures up to 350 F°. Lubricating, long lasting, rust preventative for use on automotive, marine and industrial machinery, and equipment. Ideal for tools, chains, conveyors, and shop equipment.

Red Grease HD 458120SA*Multipurpose Bentone Based Lubricant***Fragrance:** Solvent

Bentone based heavy-duty lubricant for use where a tacky, cohesive, high temperature (up to 550°F), and corrosion resistant grease is required. It is a non-melting grease for applications in which extreme pressure and anti-wear properties are a must. Appropriate for construction, fleet, marine, mining, steel, and general industrial use.

Cutting & Tapping Fluid 467820SA*Clinging Coolant & Lubricant***Fragrance:** Solvent

Blend of synthetic oils and thickening agents. Remains on the cutting bit even under extreme pressures, keeping operating temperatures cool. Protects from rust and corrosion.

Solv 400 463220FA*Safety Solvent, Non-flammable***Fragrance:** Solvent

Non-flammable, non-conductive. Contains no oil. Leaves no film. Removes dirt, grease, oil, and grime from motors and other equipment without disassembly. Excellent for use on ice and vending machines, and other refrigeration units where water clean up is a problem. Also use on electric motors (even while running), electrical equipment, generators, and power tools.

Millisolv 465016SA*Non-chlorinated Safety Solvent***Fragrance:** Solvent

Non-flammable, non-chlorinated, low odor, fast drying, non-conductive, and residue free safety solvent. Not subject to regulation under SARA, HAP, or RCRA. Solvency and cleaning performance equivalent to 1,1,1-trichloroethane. Low viscosity allows for good penetration in difficult to clean crevices, making it ideal for use in a variety of precision cleaning applications. Safe on many plastics and elastomers such as HDPE, polypropylene, phenolics, polyvinyl fluoride, and polyurethane. Certain plastics such as ABS, PVC, polycarbonates, and others may be affected. Compatible with most metals such as aluminum, brass, carbon steel, stainless steel, copper, titanium, magnesium, and zinc.

Coil Cleaner 468920PA*Foamy, Non-acid***Fragrance:** Odorless**pH:** 12.5

Eliminates the need for high pressure sprayers or bulky tank sprayers. Just spray evenly over entire coil from the air intake side. No rinsing required. Dirt and lint washes away with condensate. Net 18oz.

Adhesives

Foam & Fabric Web Adhesive 407120PA*Web Spray***Fragrance:** Solvent

General purpose web spray adhesive that is VOC compliant with good dry time. Ideal uses include tacking of fabric in the upholstery area to tacking down items for the silk screen industry. Pressure sensitive and contains over 20% solids.

General Purpose Spray Adhesive 460920PA*Screen Printing***Fragrance:** Acetone

Non-chlorinated high-solid adhesive formulated for the screen printing industry. Secures t-shirts and fleece to the platen during screen printing. Remains tacky and resists melting under the high temperatures required for flash curing. Will not transfer to the fabric or cause wrinkling. Net 14oz.

Spray Adhesive PLUS 462220PA*Web Spray***Fragrance:** Solvent

General purpose high performance aerosol adhesive offering rapid setting and quick dry time. Ideal for use on uneven or porous surfaces. Works extremely well on surfaces such as paper, cardboard, wood, leather, carpet backings, fabrics, most plastics, glass, and many other substrates. Suitable for uses where a clear, flexible, non-wrinkling, waterproof bond is desired. VOC compliant.
