PRODUCT GUIDE 58

Tolco Corporation is so much more than just trigger sprayers! After spending over 58 years developing the most innovative and high quality trigger sprayers in the industry, it is easy to see why Tolco is synonymous with trigger sprayers. However, Tolco also sells over 600 products to the Janitorial, Foodservice, Industrial, Beauty & Barber, Consumer Products and Animal Health markets. Tolco Corporation was founded by William E. Spengler in March, 1961. We began with just one product, the D-22 drum pump, which we still sell today. It was that best in class product which would be the foundation of our success. In the years that followed, we began developing the products that would define their categories. The D-22 was just the start, followed by the 320 trigger sprayer, the 942 pump-up sprayer, and continuing today with award winning and innovative products. We are committed to provide you with exciting, innovative products well into the future.

Mr. Spengler was fond of saying "Initially, all orders were shipped F.O.B. - from our basement." Much has changed since 1961, but one thing that hasn't is that

Tolco is still a family owned and operated business. The average employee has been with Tolco over 13 years, and 20% of the staff have been with us for 20 or more years.

From our family to yours, thank you for your continued support. We sincerely appreciate your trust and confidence. All of us at Tolco Corporation look forward to providing our customers with many more years of excellence.

Trigger Sprayers

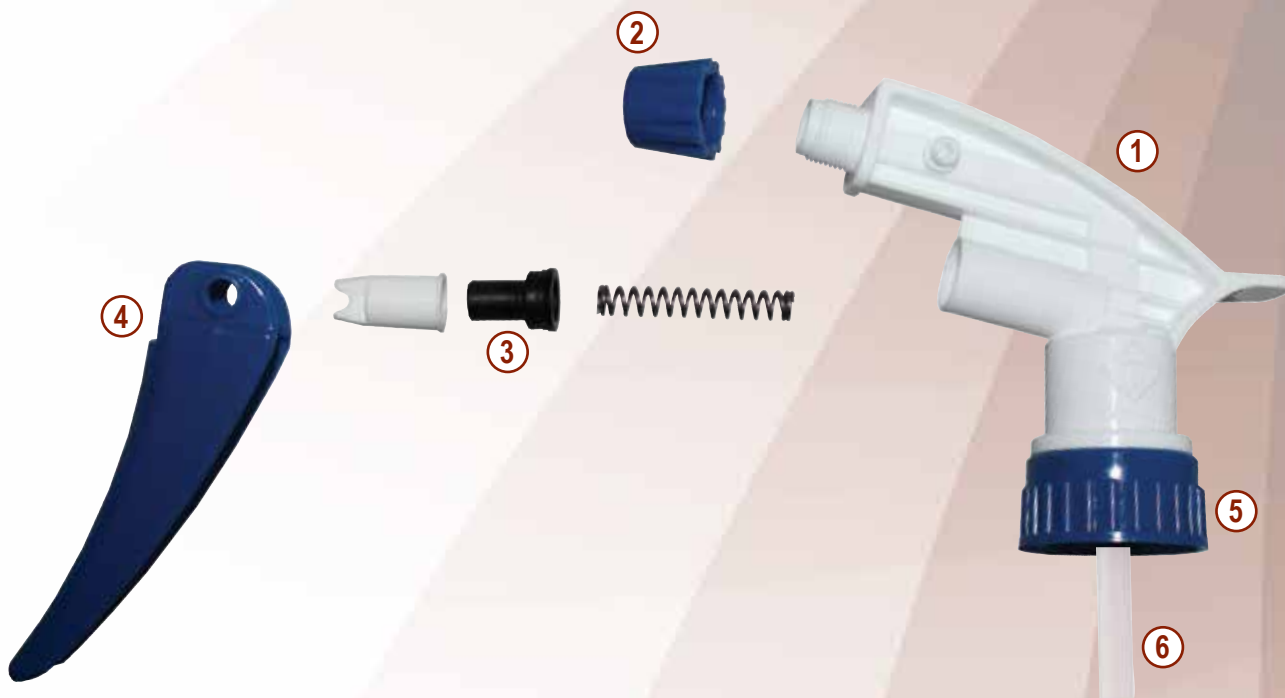

Trigger Sprayers

Trigger sprayers are available in a wide variety of colors and sizes to address a seemingly endless number of applications.

All trigger sprayers share some basic design elements such as...

- ① The Body is the housing that holds all the components for the trigger. These can be molded of a rugged single piece construction or comprised of lighter duty components covered with a shroud.
- ② The Nozzle regulates how much liquid is sprayed as well as the stream pattern. Nozzles vary in design and can be comprised of one or multiple components designed to generate specific spray patterns. Nozzles can be an on / off type which offers an off position as well as one or two fixed spray patterns. A variable type nozzle can be adjusted from off to fine mist to a strong stream.
- ③ The Piston or piston cup is one of the most important components of a trigger sprayer as it is the pump of the trigger sprayer. Pulling the trigger advances the piston cup, and releasing the trigger draws the liquid to the nozzle. Piston cups are available in a variety of materials including plastic, rubber, and Viton. Rubber and Viton piston cups are more durable and less susceptible to damage.
- ④ The Trigger can range in size from 1-finger to 4-fingers, and is used to push the piston to draw the liquid from the bottle.
- ⑤ The Collar affixes the trigger to the bottle and is available with or without a ratchet finish.
- ⑥ The Dip Tube is used to draw liquid from the bottom of the bottle. These are available in a variety of lengths and can be custom cut. Some come with a strainer, while other models do not offer this feature.

Tolco offers triggers that we classify as General Purpose, Packaging, High Output, Foaming, Chemical Resistant, and Acid Resistant. In addition, triggers can be further classified as non-leaking. This indicates that the trigger has a gasket where the collar meets the bottle which prevents liquid from leaking if the bottle is tipped over or agitated.

General Purpose Trigger Sprayers

General Purpose Trigger Sprayers do not include a gasket where the collar meets the bottle. Tolco stocks general purpose trigger sprayers in a wide variety of colors, with outputs ranging from 1.1mL to 1.4mL. Additional colors, designs, and outputs can be special ordered for larger volume applications. Minimums apply.

MODEL 320™ GENERAL USE TRIGGER SPRAYER

- The leading general purpose trigger sprayer in janitorial and industrial markets
- Rubber piston cup extends life and provides broader chemical resistance while the outer body protects piston assembly from damage during use and storage

General Purpose Non-Leaking Trigger Sprayers

Non-Leaking General-Purpose Trigger Sprayers include a gasket where the collar meets the bottle. Unlike Packaging Trigger Sprayers, these are not intended to be affixed to a bottle prior to shipping. These are either included in a box with the product or sold separately. Tolco stocks general purpose non-leaking trigger sprayers in a wide variety of colors, with outputs ranging from 1.0mL to 1.6mL. Additional colors, designs, and outputs can be special ordered for larger volume applications. Minimums apply.

Packaging Trigger Sprayers

Packaging trigger sprayers are all non-leaking designs and include a gasket where the collar meets the bottle. These triggers are designed to be shipped affixed to a bottle. Packaging triggers typically have a lower profile to reduce required carton height and the top of the trigger is relatively flat to allow for the carton to securely seal on the bottle to minimize bottle movement in transit. Tolco stocks packaging trigger sprayers in black or white with outputs ranging from 0.7mL to 1.5mL. We also stock ratcheted collars, as well as standard collars. Additional colors, designs, and outputs can be special ordered for larger volume applications. Minimums apply.

KOMODO™ URINAL FLOOR MAT

- Komodo mats are on average over 36% less expensive than competitors' products
- Komodo mats' proprietary nonwoven material stands up to regular mopping and high traffic use while providing exceptional protection, and odor control by wicking moisture to the surface to allow it to rapidly evaporate
- Komodo mats' patent pending design allows for packaging that is on average over 47% smaller than competitors' products allowing for twice the number of units to be warehoused or stored in the same amount of space as traditional urinal mats
- Komodo urinal mats are NFSI Certified as HIGH TRACTION, thus reducing the potential for slips and falls

RESTROOM FLOOR MATS

- Urinal and commode mats are approximately 5% larger than traditional products and provide greater protection to the floor
- Urinal and commode mats are manufactured with a material that has a high coefficient of friction - they have better traction and a soft flexible material that conforms to surface irregularities providing secure placement of mats
- A 36% reduction in the product's profile makes urinal & commode mats ADA compliant against trip hazards

"Section 16: Other Information", in OSHA Brief "Hazard Communication Standard: Safety Data Sheets":

Employer Responsibilities

Employers must ensure that the SDSs are readily accessible to employees for all hazardous chemicals in their workplace. This may be done in many ways. For example, employers may keep the SDSs in a binder or on computers as long as the employees have immediate access to the information without leaving their work area when needed and a back-up is available for rapid access to the SDS in the case of a power outage or other emergency. Furthermore, employers may want to designate a person(s) responsible for obtaining and maintaining the SDSs. If the employer does not have an SDS, the employer or designated person(s) should contact the manufacturer to obtain one.
