

# Bare by **SOLO** and USDA BioPreferred Eco-Forward Products

# FOR TODAY. FOR TOMORROW. FOR GOOD.™

COMMERCIALLY COMPOSTABLE RECYCLED CONTENT RENEWABLE RESOURCES BIOBASED CONTENT

#### Bare® by SOLO and USDA BioPreferred®

Eco-Forward® products for the foodservice industry

### GOOD FOR BUSINESS. GOOD FOR EVERYONE.

## COMMERCIALLY COMPOSTABLE, RECYCLED CONTENT, RENEWABLE RESOURCES, BIOBASED CONTENT

Dart Container is committed to making a positive difference to the environment, offering a full portfolio of Eco-Forward® products with various environmental attributes. Dart will continue to bring Solo® packaging innovations to the marketplace utilizing sustainability criteria that meets or exceeds Dart's high standards of product function, quality and reliability.

Dart demonstrates this commitment to the environment by working toward sustainable solutions that optimize the use of recycled, recyclable, commercially compostable or renewable resource materials. Initiatives and programs to reduce our environmental footprint and those of the products we make cross all of our operations and functions.

## Bare® by **SOLO**® Material Profiles

## Poly-lactic Acid (PLA)

A material made from plant-based renewable resources.

#### Single-Sided Poly-lactic Acid (SSPLA)

A material made from plant-based renewable resources that is applied to a single side of a PLA container, providing additional heat tolerance.

#### Bagasse (Sugarcane)

A fiber material made from used sugarcane stalks, which is a renewable resource.

## ريَ

## Post-Consumer Recycled Content PET Plastic (RPET)

Recycled plastic used from water bottles and other containers after consumer use.

## Post-Consumer Recycled Content Fiber (PCF)

Paper fiber that has been recovered and recycled after consumer use.

# **Eco-Forward**® Product Requirements

#### RENEWABLE RESOURCES

A naturally occurring resource that can replenish itself naturally. They include corn, bagasse and trees.

#### POST-CONSUMER RECYCLED CONTENT

Supporting the use of post-consumer recycled content is a key tenet of Dart's Eco-Forward® platform. Requiring post-consumer recycled materials, instead of post industrial sources, helps create market demand for consumer recycled materials. Dart's Eco-Forward® offering includes products made with recycled PET water bottles and containers and paper collected from offices and school recycling programs.

# Bare® by **SOLO** Brand

Dart is **B**ringing **A**lternative **R**esources for the **E**nvironment with a broad environmental platform. Bare® by Solo offers a large breadth of Eco-Forward® cup, dinnerware and food container solutions to meet every packaging need. Bare® by Solo can accommodate operators needs with a variety of neutral colors and complementary prints, by providing an assortment of mix-and-match options to complement any décor or occasion.

#### **COMMERCIALLY COMPOSTABLE**

In a number of communities, commercially compostable products are the preferred environmental choice. Dart's products identified as commercially compostable meet the ASTM D6868 or D6400 standard for compostability and are compostable in a commercial composting facility which may not exist in your community. Not suitable for backyard composting.

To find a composter in your area, go to www.findacomposter.com

# **USDA BioPreferred®** Program

Managed by the U.S. Department of Agriculture (USDA), the goal of the BioPreferred program is to increase the purchase and use of biobased products. The BioPreferred program was created by the 2002 Farm Bill and reauthorized and expanded as part of the Agricultural Act of 2014 (the 2014 Farm Bill). Federal law, the Federal Acquisition Regulation, and Presidential Executive Orders direct that all federal agencies purchase biobased products in categories identified by the Department of Agriculture (USDA). Biobased products are derived from plants and other renewable agricultural, marine, and forestry materials. Dart products that meet the BioPreferred criteria are designated in this brochure and can be found at www.biopreferred.gov.

## Single-Sided PLA (SSPLA) Paper Hot Cups

- Compostable in a commercial composting facility which may not exist in your community.
   Not suitable for backyard composting. Meets the ASTM standard D6868 for compostability by the Biodegradable Products Institute (BPI)
- We source fibers certified under the  $\ensuremath{\mathsf{SFI}}^{\tiny{\circledcirc}}$  chain of custody
- Accepted at all Cedar Grove commercial composting facilities
- Ideal for hot beverage applications
- Custom print capabilities

## Post-Consumer Fiber (PCF) Paper Hot Cups

- First-ever, FDA-compliant, PCF paper hot cup
- Made with a minimum of 10% post-consumer recycled fiber
- Less virgin material used to make PCF hot cups, reducing the impact on valuable natural resources
- We source fibers certified under the SFI® chain of custody
- Ideal for hot beverage applications
- One lid fits four cup sizes
- Custom print capabilities

## Post-Consumer Fiber (PCF) Paper Hot Cups - Perfect Pak®

#### **FEATURES & BENEFITS**

- First-ever, FDA-compliant, PCF paper hot cup
- Made with a minimum of 10% post-consumer recycled fiber
- We source fibers certified under the SFI® chain of custody

- Made with poly lining which acts as a moisture barrier to keep liquid inside the cup
- Smaller case packs ideal for small businesses

## Waxed Treated Paper Cold Cups

- Compostable in a commercial compost facility which may not exist in your community. Not suitable for backyard composting. Meets the ASTM standard D6868 for compostability
- We source fibers certified under the SFI® chain of custody
- Accepted at all Cedar Grove commercial composting facilities
- · Cost efficient/economical
- For use with a cold beverage; especially thick heavy beverages such as milkshakes and smoothies
- Rolled rim cup to ensure a secure lid fit
- Custom print capabilities

## Flexstyle® Double-Sided Poly (DSP) Paper Food Containers

- We source fibers certified under the SFI® chain of custody
- Features a wide formed rim that makes the container more rigid and durable
- Double sided polyethylene coating keeps liquid inside and minimizes sweating on the outside
- High gloss coating allows for exceptional print quality and a smudge-free surface
- Flush fill capacity on all sizes except 32 oz. for portion control
- Only paper food container line available with spiral wound paper lids that helps prevent leaks and lets steam escape

## Bagasse (Sugarcane) Dinnerware

#### **FEATURES & BENEFITS**

 Compostable in a commercial composting facility which may not exist in your community.
 Not suitable for backyard composting. Meets the ASTM standard D6868 for compostability by the Biodegradable Products Institute (BPI)

- On-trend square plate and bowl design enhances food presentation
- Excellent rigidity and soak-through performance
- At least 50% stronger than Solo's standard 9" plate
