SaniGuard Kills Classroom Germs Before They Can Spread, Keeping Your Students And Your Funding Healthy.

Everyone knows healthy students learn better, which leads to higher proficiency test scores, but as more and more funding is based on average daily attendance; absenteeism has become not only a health issue but an economic one. On average an absent student cost $40 per day per student in lost funding. Last year nearly 22 million school days were lost due to the common cold alone. Add the cost of substitute teachers and staff and it's easy to see the impact of germ related illness on funding.

Kills Germs On The Surfaces Where They Live, Before They Get On Hands.

Hand washing programs have had a measurable effect in decreasing absenteeism but as soon as the student touches any surface the hands are contaminated all over again. SaniGuard® kills the germs on the surfaces where they flourish and because it **dries on contact** there is no need to wipe or rinse.

Stop The Spread Of The Germs That Cause Meningitis, Staph, Strep And Influenza.

SaniGuard® Sanitizing Sprays and Foggers can be used almost everywhere in your school. SaniGuard® goes wherever your students go, killing germs before they spread. SaniGuard® Spray can also be helpful in sanitizing high usage objects, simply spray SaniGuard® on germ hot spots such as: water fountains, toilet seats, computer keyboards and mouse, headphones, musical instruments, gym equipment, toys/games, door handles, telephones, desks and lockers to stop the spread of germs where it starts. In college dorms where illnesses like **meningitis** and **strep** can run rampant SaniGuard® kills the bacteria, funguses, and viruses that cause these life threatening diseases.

Use SaniGuard® To Kill Germs In:

- Rest Rooms
- Cafeterias
- Computer Labs
- Day Care Facilities
- Senior Centers
- Libraries
- Administrative Offices
- Health and Fitness Facilities

SaniGuard® stops the spread of:

- Influenza
- Strep
- Staph
- Colds
- Measles
- Mumps
- Rubella
- Meningitis
- Scarlet Fever

And much more!

Protecting Student Athletes.

Athletic Departments have recently felt the damage germs can do to student athletes. Whether wrestling, football, basketball or baseball, almost all shared athletic equipment creates a breeding ground for infection. SaniGuard® kills MSRA, Hepatitis, HIV, Herpes, Ring Worm and other harmful germs on contact. Halting the spread of these germs before infections can set in that can lead to hospitalization and even death in some cases.

Safe And Effective.

SaniGuard® Sanitizing Surface Spray effectively kills 99.9% of germs, bacteria, viruses and fungus in mere seconds. EPA registered SaniGuard® Spray is also effective on electronics and even paper – no damage or contamination to worry about. That means you can use SaniGuard® everywhere from your computer room to your library.

SaniGuard® Total Release Fogger allows you to sanitize an entire room in just minutes and is just as effective as the spray. It's perfect for larger hot spot areas such as locker rooms, rest rooms and the nurse's office. For the classroom, when several students report absent simply release a fogger in that room to stop any further spread of infectious germs. SaniGuard® is also safe for food surfaces too, so even heavy germ areas like cafeterias can be easily treated against bacteria like **E-Coli** and **Salmonella**.
